

What is your disability?	Do you have any other diagnosis, including mental health diagnosis?	How long have you been disabled?
--------------------------	---	----------------------------------

CSDP dogs assist people with mobility impairment, such as multiple sclerosis, muscular dystrophy, paraplegia, stroke or spinal cord injuries; children and teens with Autism or neurocognitive disabilities; and veterans and active duty military with Post-Traumatic Stress Disorder (PTSD), traumatic brain injury or mobility impairment.

If disability was caused by injury, what progress has been made post injury?

If you are a veteran or active duty military applying for a PTSD dog, please describe all past or current treatment, including frequency and duration, related to military PTSD.
